

Question	Answer
Country	Islamic Republic of Mauritania
Organization Name	Ministry of Higher Education, Scientific Research and Information and Communication Technologies
Email	info@mesrstic.gov.mr
Telephone	+222 45250448
Do you support the recommendation of a multistakeholder ‘systems’ approach for cooperation and regulation that is adaptive, agile, inclusive and fit for purpose for the fast-changing digital age? To what extent is the “multistakeholder” aspect important?	Yes. We support the recommendation of a multistakeholder “systems” approach for cooperation and regulation that is adaptive, agile, inclusive and fit for purpose for the fast-changing digital age. The “multistakeholder” aspect is very important. It will also the construction of fair "System" where the developing countries have the suitable role.
In what ways would a new/ improved model promote actionable outcomes?	After the COVID-19 pandemic and its economic impact, the world understood the need to move into the real digital age. This awareness should be materialized by a new / improved model to promote concrete results
How can broader participation of government and business representatives, particularly from small and developing countries and SMEs, be ensured? Is there a role for the UN?	To ensure broader participation of government and business representatives, particularly from small developing countries and SMEs, the UN can cover the cost of experts helping each country to continue to reflect on this approach and " integrate into its strategic vision.
What means of implementation are required for a sustainable system?	The Covid-19 crisis has shown us that our sustainable development policies can no longer be based only on the three “economic, environmental and social” dimensions, but must now integrate a new dimension of “resilience” in our production and supply processes. services, payment and exchanges in general. This new dimension, based on the adaptation and appropriation of new paradigms resulting from innovations in the digital field, will allow us to have a new model of sustainable development making our production and exchange processes resilient and able to withstand shocks or crises such as the health crisis we have just experienced.
What structure, membership and responsibilities could a new Advisory Group have? What are its potential benefits compared to the current MAG?	The new Advisory Group must have more resources
What are your thoughts on the following proposals? What structure, membership and responsibilities should each have? - Cooperation Accelerator - Policy Incubator - Observatory and Help Desk	We need all these organizations - Cooperation Accelerator - Policy Incubator - Observatory and Help Desk
What are your thoughts on a new IGF Trust Fund? If considered, how should it look like, what expenses should it cover, and—accordingly—what annual budget would it need?	A new IGF trust fund might be a good idea. It must have sufficient resources to support the implementation of a new vision of sustainable development through the adaptation and appropriation of new paradigms stemming from digital innovations.
What gaps in the existing digital architecture could the COGOV model address? What are its potential benefits compared to the business-as-usual scenario? How might it interact with existing mechanisms?	
What structure, membership and responsibilities could the distributed co-governance mechanism take on? How might principles governing the logical and infrastructure layers be applied in economic and social layers of governance?	
What existing networks, if any, fit the necessary prerequisites of transparency, inclusion, multistakeholderism, to serve as pilots for COGOV?	
How would the COGOV Architecture contribute to the development of digital norms?	
What gaps in the existing digital architecture would the Digital Commons model address?	
Which aspects/features of the proposed architecture should be further considered?	
Do you see scope for combining the three models and if yes, how could this be operationalized	
What are key shared values, principles, understanding and objectives for a global digital cooperation architecture that should be included in a “Global Commitment for Digital Cooperation”?	
What role do you see for the UN in the future of global digital cooperation? What would the profile, responsibilities and role of a Technology Envoy (to be appointed by the UN Secretary-General) be?	The idea of a technology envoy (who will be appointed by the UN Secretary General) is very interesting. it can help developing countries to initiate and benefit from all cooperation projects.
Which other ideas, mechanisms and features are worth considering?	The organization of an annual forum on the role of digital technologies in achieving the Sustainable Development Goals is important. A responsible for this aspect should be appointed in each state
